

20260523_1:18am_While requesting the public records related to the sirens at 1:07am, a vehicle drives directly in front of our home.

20260523_107am_While working on the phrase 'commented on Cadet Lynch's catchpole being used to threaten him in the form of a weapon, a police siren is continuing to sound and get closer and closer to the house. It is very loud and very close to the house now - 109am. Ends at 110am. I find this to be a direct relationship between 'tightening a noose' of police around my home. These are threats being carried out to unlawfully engage law enforcement against my life in retaliation against my rights to speak freely and publicly about my personal experience in political engagement.

20260523_1258am_As I work through the process of dissecting the report of Officer Hernandez, everything is quiet near my home until I reach the point in the paragraph that states "The resident, Chris Carlin was aggressive upon opening the door" at which time a loud engine begins to vibrate and agitate our home. It sounds like an aircraft or helicopter flying nearby.

20260522_12:57pm_After receiving multiple 'silent signs' from people parading past my home this morning, I am experiencing continuing audible agitations, vehicles passing the front of my home, bass thundering and an ongoing engine agitation sound while gathering photos and submitting me Letter of Representation to the City of San Antonio.

20260522_240am: Return, of both the symbolism and another vehicle passing my house while I restart writing my legal documents of notice to COSA Animal Care Services.

20260522_1254am_While working on my letter of representation and notice of intent to file suit to the director of the COSA Animal Care Services, a vehicle loudly drives past my home. It is important to note at this time that our internet is currently down from the recent storm. These spying devices that are being used against our home are able to provide their own internet connectivity. This is a fact that I have already documented much earlier in this process. This is one of the proven facts that has led me down the path of investigating the military assets which will be discussed in greater detail at the appropriate time. I am currently working offline and am still experiencing noticeable (albeit less) agitation and signaling. (Here is a vehicle driving past my house at this very moment as I write that statement.) Again, this is being monitored in real time, through an internet feed that is wholly independent of my own, and this spying force is actively spying on and interfering with preparation of official legal documents.

20260521_944pm_Train or Truck Air horn sounds in the near distance as I collect the identifying information for the Director of the Animal Care Services and begin preparing legal documents.

20260521_0845pm_Numerous vehicles stream by the front of our home while I am composing the first portions of the official SAPD complaint documents and posting the latest update online. Another car streams past the house as I write this note. (Also note that there has been an absence of vehicles while I am not working on this legal work.)

(To be very specific, it is not the mere fact that a car is streaming past my house on countless occasions every day, it is the *timing* with which so many of the vehicles are coordinated to my tasks, movements, and moods.)

20260521_800pm_ I am currently contrasting police duties according to the police procedures manual and the video recording of the shooting incident and investigation at my home. I can very clearly perceive (with a loud vehicle starting and driving by my home at this very moment) that my legal work is being watch and 'responded to' with various vehicle agitation sound effects as I produce the work.

20260521_753pm_ As I search for video evidence of the shooting scene at my house on August 08, 2024, cars are increasingly driving by to agitate the longer I attempt to search through for specific pieces of video that are not readily apparent or easily found in the security footage. This is an ongoing effect of increasing the agitation levels when items are lost or difficult to find. Multiple vehicles have passed by the front of our home now even as I type this note. (at 7:54pm on a Thursday.)

20260521_739pm_ While recording the details of my attempt to contact SAPD to file a report today, a loud vehicle streams past my home (increasing its effect by attaching itself to aggravating circumstances that are happening at the time eg the inability to file a police report without excessive impediments, obstructions, or accusations / questioning of me and my own perception).

20260521_1150am_ As I compile the documents related to our move to Spain to seek political asylum, loud 'rumbling' vehicles begin passing by our house. Increasing the tension, increasing the aggravation, and re-hashing the same forces that caused us to seek political asylum in Spain to begin with. There is currently an ongoing engine rumbling somewhere nearby that is causing a firm and constant agitation force inside of our home - noticeable audible sound of engine rumbling, and a physical vibration in the home (this is coupled with another vehicle driving past our home as I record this entry).

20260521_1120am_ A car passes by our home as soon as I begin drafting public notice of my legal case against the City of San Antonio (this document is not yet public. I am drafting it on my computer offline.)

20260521_1004am_ While discussing legal strategy with my wife, several cars signal their attention to this matter. And another confirmation vehicle drives past our home as soon as I begin typing this note regarding the same. (This is an ongoing attempt to engage our house using a 'vehicle' that is untraceable, unprovable, and yet still effective at communicating their constant presence in our life. (On a more general note, the overall activity of the agitations has definitely increased in a proportional response to the assertion of my legal rights - this evidences the retaliatory aspect of their ongoing attempt to engage our home with harmful attention and stimulation).

20260521_0201am_ Another numbers sign and also while I am working on this file 20260429_Satan is Trying to Lead You to Ruins - loud bass is heard inside of my home from a nearby vehicle or nearby home. The effect is temporary, not long lasting - these

are messages being injected into my home as a spying force monitors my activity - (drives a loud vehicles directly past my home now). Again, now three 4, 5, 6 , 7 gunshots ring out (I called 911 to report those gunshots and heard a crowd of people about a block up and a block over northeast of our home outside)(sirens are now heard in the distance at 2:08am)_213am - aircraft or helicopter is now flying around nearby

20260521_0123am_ A loud vehicle quickly drives past my house to signal the leadership of the crown. This is all a part of the 'Numbers Gang' that threatened me in my front yard. The 'numbers' are in fact representative of a series of words that speak messages. This is proof that directly relates to the criminal threats against me. This is rehashing, re-instilling, and re-threatening me on a daily basis to re-iterate the fact that I am being watched and threatened by a gang of people that 'publicly' identified themselves to me as the 'numbers gang', but who are, in fact, Freemasons. This 1:23 numbers confirmation of a car driving past my house also offers supporting proof to the 1:16 train. These are not random. The train passing by at the exact moment of sunrise to ruin our maternity photos was also not random, nor was the man on the bridge with the sling of many colors.

20260521_0116am_Increase of agitations as I work through the timeline of events. There is a train now moving past our house. I can distinctly hear the noise in my home and can feel the vibrations from a short distance away. 1:16 is an ongoing attempt to use the number 16 as an extortion threat against me.

20260521_1257am upon opening and reviewing the file 20251102_On First Responders Being Used as Props in Script of Terror Against Our Home_1 - car engine rev nearby and agitations sound in the vicinity.

20260521_1225am: As I work to the end of the first box of legal files that I am organizing as my work product, a symbolic vehicle drives past the front of my home. This is an ongoing occurrence throughout the day that aligns with numerous other 'beginning and 'end' of the task marker points to continue proving that I am subjected to illegal spying inside of my house that includes a visual understanding of my movements inside of my home.

20260520_1005pm Vehicles continue to drive past my house as I upload documents to the Archive.org service for public view. These are the extraordinary actions that I am forced to take to document the ongoing abuse of our home, the spying into my private and professional work, and the harm that it is causing to our family on a minute to minute basis in our live. To be clear, I am documenting a limited amount of ongoing and continuous abuse by a spying car / noise generating feedback loop placed over and around our home. To document the entire amount of abuse that we are suffering would be unduly burdensome and would also exponentially increase the abusive agitations that we are experiencing.

20260520_9:47 pm: heavy bass is sounding outside of my house now after publicly

posting the notice to the city attorney's office and publicly stating my intention to file suit against COSA.
